PETITE PERFORMA 2 THE STAND

At Image we have the perfect answer to anchor the Petite Performa2 at the correct listening height with optimum stability and ultimate aesthetics.

THE STAND is a true extension of Petite, both visually and acoustically. After extensive listening we have found that the all-important frequency balance, system dynamics and detail is maintained when THE STAND is used to support this model. It is purpose built and must be ordered with Petite to ensure that the chosen veneer figures seamlessly up one side and down the other, plus down the front baffle. This attention to detail is important to us at Image.

Both Petite and THE STAND are fitted with recessed steel discs. Steel bearings (supplied) are placed between both cabinets when the system is setup. This locating system is a vital part of the overall design and serves to both mechanically isolate the enclosures plus prevent minute cabinet movement. Countless hours were spent optimizing this method of support and it has proven to be the best method when also used with our passive bass system, MASS.

THE STAND is supplied with ACCU-Base, an Image development that increases the footprint of THE STAND and adds structural stability to Petite. ACCU-Base is simply bolted on to the bottom of THE STAND before the brass floor spikes are screwed in place.

PETITE PERFORMA2 - THE STAND SPECIFICATIONS

Dimensions(cm):
58.6 x 19.5 x 29.6 (h x w x d)

Weight:
14kg each

Facilities:
Hand-turned and adjustable solid brass floor spikes.

THE STAND can be converted into MASS at any stage by returning THE STAND to Image Loudspeakers for the upgrade. There is no compromise to MASS by retro-fitting the bass drivers to THE STAND which is already fitted with all necessary bracing.
